

Tubular-Rail-Scraper

For 2" and 1 1/2"-Railtube

100 % - made of stainless steel

- **The Railtube scraper** is the ideal helper for cleaning pipe conveyors in slaughterhouses.
- Can be used on rail-tube conveyors with and without an external conveyor drive.
- Can be used for left and right hook side.
- Effective scraper performance for grease build-up.
- Height-adjustable drip tray for grease drips.
- Easy and simple operation.
- Increasing occupational safety because no pedest or ladder insert required.

Marchel Tubular-Rail-Scraper in detail

It is designed for the food industry and fulfils all requirements for hygiene and ease of use.

All components such as the bracket construction, centre tube and drip tray are made of stainless steel.

Resistant to the most common chemicals, cleaning agents and highly concentrated salt solutions.
